A PSA prostate cancer screening event will take place

Monday 31st March 2025

**The Vermuyden Centre,
Thorne**

Calling all men 40 and over who live in DN3, DN7, DN8 or DN9, take a PSA test for prostate cancer and it could save your life.

In its early stages, prostate cancer generally produces no symptoms, so it is important to diagnose the disease before symptoms arise and while it is still potentially curable.

A PSA test is nothing more than a simple blood test. It's currently the best readily available indicator of a possible prostate problem. For something so simple that delivers such benefits why wouldn't you invest a few minutes of your time taking a test.

Book your test now
